FIND DOCTORS. SCHEDULE CARE. SAVE MONEY.

Manifest gives your employees a personalized guide to local health care, making it easier to know where to go for quality care at a better value.

Find High-Value Healthcare Providers

The cost of the same type of care can vary depending on where you go. People often choose a provider based on a referral, familiarity, or convenience. They may not realize another local provider could offer the same high quality care at a lower cost.These choices can affect both your company's healthcare spending and your employees' out-of-pocket costs.

Manifest works alongside your existing benefits team, insurance agent, carrier relationships, and networks to identify local opportunities and help turn them into practical solutions.Manifest builds a custom online provider guide for your company, so employees know where to find high-value local care before they need it.

Each guide is configured around your company's location, workforce and benefits. It features high-value local providers from the Manifest Provider Collective, with their locations, services and answers to common questions.
